# Structured Hiring, Recruiter Ethics & Interview Standards

Policy Title: Structured Hiring, Recruiter Ethics & Interview Standards | Document ID: policy_hiring_recruitment_2026

Effective Date: February 1, 2026 | Version: 3.0 | Department: Talent Acquisition & HR | Status: Active

1. Deterministic Requirement Verification:

Recruiters and interviewers must evaluate candidates strictly against deterministic job requirements extracted from approved job descriptions. Subjective scoring formulas or arbitrary percentages are barred.

2. Calibrated Interview Panels:

All interview panels must consist of at least two calibrated interviewers. Independent written notes and structured feedback must be submitted within 24 hours of interview completion.

3. Candidate Data Retention & Privacy:

Candidate resumes, interview feedback, and evaluation records are retained for 12 months for compliance auditing, after which they are automatically archived or purged upon candidate request.

4. Consequential Action Authorization Gatekeeper:

Interview invitations and calendar bookings strictly require explicit human confirmation. State mutations must never be dispatched automatically without human recruiter authorization.
